

It Is Not Enough

to have the bowels move. It is more important to persuade liver, kidneys, skin, and bowels to act in harmony and against self-poisoning. BEECHAM'S PILLS act favorably upon all organs concerned in food-digestion and waste-elimination; they remove causes as well as relieve symptoms.

BEECHAM'S PILLS

Worth a Guinea a box.
Sold everywhere in Canada. In boxes, 25c., 50c.

Passing Events

Second only to the perverted view held by a vast majority of people that the chief aim in life is the amassing of money and the enjoyment of those fleeting pleasure and luxuries which money can procure, is the gullibility of the public in snatching at get-rich-quick schemes which unscrupulous but clever promoters and swindlers dangle before the people. The idea that there is something fine and noble in work itself, in worthy ambitions realized, in service well rendered, and that a monetary reward is not the be-all and end-all of existence appears to be fast dying out, and a person's success or failure in life has come to be measured by the standard of his success in amassing money. It is a false standard and an unsatisfactory one. The truly successful men and women are those who can point with conscious pride to some real achievement benefiting themselves and their fellow men.

The desire to get money not honestly earned—which can only be gained by one individual through the loss by some other individual—and to get it quickly and without effort is the bait used on every trap set for the unwary, and for every one who does obtain wealth in this ill-gotten way there are hundreds of victims who lose. The latest example is afforded by the operations of a man named Ponzi, at Boston, who promised to pay 50 percent profit in ninety days on monies invested with him. Thousands of people entrusted him with their money to a total of many millions of dollars. Now he is bankrupt and in prison, while his victims are sadder, but it is doubtful if they are wiser. The only safe road to wealth is along the cultivation and practice of habits of industry, frugality, perseverance and care. And even this road may not lead to the desired haven. But if it does not, there need be no regrets for travelling along such a road a person will at least have the satisfaction of accomplishing something, and leaving the world better than he found it.

Indications as to the relative degree of activity prevailing in business circles in Eastern and Western Canada are shown by various statistical tables for the month of July last, and these reveal the fact that, while development in the East is only about holding its own with last year, in the West very marked strides forward are being made. Building permits issued in July in 26 Eastern cities totalled \$7,242,536 as compared with \$6,919,444 in July, 1919, an increase of only \$271,495, whereas in fourteen Western cities permits issued amounted to \$5,098,650 as compared with \$1,726,595 a year ago, or an increase of \$3,372,055.

Several large Eastern manufacturing concerns have shut down portions of their plants temporarily, or have reduced their staffs, thus throwing a considerable number of men out of employment, one firm alone, which has run three shifts of workers for the past nine years, cutting the num-

ber to two and releasing 600 men from employment.

On the other hand, the annual influx of harvest hands into the West has brought thousands of young men here, and the banks are anticipating the need of generous assistance from the federal government in the task of financing the marketing and transportation of the 1920 grain crop which promises to be the best for some years past.

In this column some weeks ago the advice was rendered to all who could possibly do so to buy their winter's supply of coal and get it in storage during the summer months before the grain crop began pouring into the elevators for transportation to the lake ports. Those who followed this advice will unquestionably be glad of it, not only because they are assured of an adequate fuel supply in the face of a probable shortage, but because of the money they will have saved thereby as it now seems almost a certainty that there will be a decided increase in freight rates and consequent substantial jump in the price of coal. In these modern and more commercial days the parable of the wise and foolish virgins still holds good. We call it "Preparedness" or taking time by the forelock, that is all.

Guilty of Assassination

A man, razor in hand, was caught by his wife assassinating not an enemy, but a corn—which he needed was Putnam's Corn Extractor. It's safe, painless and cures. Try "Putnam's" cures so fast, 25c. at all dealers.

A Shocking Tragedy

Three Hundred Patients on Hospital Ship are Drowned

Particulars have reached Stockholm of a terrible catastrophe which occurred on the Neva recently, when a hospital ship sank with 1,200 spotted typhus patients on board. It was an old German vessel. The patients were laid up in their cabins. Before the ship sank it was plundered by the Bolsheviks, who unconcernedly left the patients to their fate. About 300 are believed to have been drowned. Nothing is mentioned of the matter in the Bolshevik papers except that 200 of the crew perished.

Minard's Liniment for Dandruff.

New Canadian Warships
Cable advices received at Ottawa by the Naval Department state that the cruiser Aurora, and the destroyers Patriot and Patrician, will be in commission October 1, and will in all probability proceed to Canada in the week following. These three vessels, together with two submarines now in Canadian waters, comprise Canada's new fleet.

Bufoalco, an Italian painter, drew caricatures in the fourteenth century, putting labels with sentences to the mouths of his figures.

There are 400,000 cafes in France—one for each eighty inhabitants.

There are many brands of tea and coffee—you take your chances on quality—and you pay the price.

But there is only one brand of

INSTANT POSTUM

—invariably high in quality and invariably moderate in price. A Fair Trial Tells.

Keep Thin in Middle Age

Corpulence May be Reduced by Abstaining from Fat Meats.
Adding to the bulk of the body in middle age is risky. This does not mean that the diet should be Spartan. It must be simple and moderate. Tasty dishes tempt stout people to eat too freely. Corpulence may be reduced by abstaining from fat meats, sugar, soups and pastry. Bread and potatoes should be eaten rather sparingly. Fresh fruit and green vegetables may be taken in moderation. No sedentary middle-aged person can eat hearty meals habitually without impairing health and curtailing the span of years. The diet must be plain and digestible, and the quantity eaten limited strictly to the repair of tissue expended in work.

MOTHER!

"California Syrup of Figs"
Child's Best Laxative

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear. You must say "California."

Belgians Are Doing Well

Every Inch of Soil is Cultivated and Crops are Bountiful

The British Mission at Spa were astonished at the smiling prosperity of Belgium. Every inch of soil is cultivated, and the crops are bountiful. Indeed, one might well learn a lesson from the Belgians in the use of the land. It may safely be said that in Belgium every single field is utilized to the fullest extent.

Buildings of all sorts are in splendid order. More coal is being produced than before the war; the people are working hard; there is a great deal of enterprise, and, generally speaking, Belgian industries are thriving in a remarkable way.

The Belgians are to receive eight percent of the war indemnity. If it is fixed at \$5,000,000,000, they may hope to receive \$480,000,000, in addition to which they are to have first charge over the first hundred millions of their share.

In other words, every Belgian will get about £60 per head war indemnity. Today the Belgians, in proportion to their numbers, are accounted the richest people in Europe.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera, infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles, or if the trouble comes suddenly—as it generally does—the Tablets will bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Vanderbilt Buys an Island

Cornelius Vanderbilt, Jr., states that he has purchased for his wife an island in Sprout Lake, near Alberni, Vancouver Island. He intends to construct a hunting lodge at which he and his wife will spend vacations.

Saves Three Lives

George Bastien is to be recommended for the Humane society medal, for having saved the life of two bathers at Nobel, Ont. It is also stated he saved another life at Sault Ste. Marie some weeks ago.

When a woman can't get a servant to do her work there is no help for it.

Perfects Aeroplane To Explore Africa

Easily Attains Speed of A Hundred Miles an Hour

A new type of hydro-aeroplane, operated by three helices, has been completed and will be marketed soon by Jean Latham, son of Hubert Latham, who two years before the war met his death while hunting in the Congo.

Scientists here prophesy that Mr. Latham's invention will greatly facilitate exploration work in the interior of France's colonies, as it combines three great factors—speed, carrying power and comparative lightness of equipment, and furthermore is able to use the smallest streams in case of accident.

The cabin contains room for four passengers, as well as compartments for reserve supplies of petrol, food, wireless apparatus and machine guns, all of which are in a big fuselage. All the machinery for the operation of the craft is above the heads of the passengers.

In trial tests the hydroplane, carrying three tons, mounted half a mile in four minutes, a mile in eight minutes and three miles in thirty-four minutes. The speed test showed a maximum of a hundred miles an hour, which was easily attained.

Movies of Hudson Bay Country

The great naval seaplane of the Canadian Aero Film Company has left on an 800 mile trip to Hudson Bay, where pictures will be taken for the provincial government and a survey made for the Dominion Government. The plane is bound for Belcher Island on the west coast of Labrador in the Bay, and stops are being made at North Bay, Cochrane and Moose Factory.

Less Employment in East

Reports Indicate, However, That the Labor Market Firm on Prairies

Reports from over 5,000 employers to the Dominion headquarters of the Employment Service of Canada, department of Labor, indicates that, disregarding loss of time due to strikes, there was a decline in the volume of employment during the week ending July 3, as compared with similar reports covering the previous week. A decrease had been expected, but not on such a large scale. For the following week, however, these firms anticipated making substantial additions to their payrolls. In comparison with their returns they reported that they had enlarged their staffs very considerably.

The three Prairie provinces were the only ones to record an increase, while among the best of Ontario had the biggest. The best increases were in railway construction work, edible plant products, and building construction. Further increases were expected. Largest reductions were among the firms manufacturing rubber goods and iron, steel and lumber products.

A slight decrease in placements by the employment service is recorded by the department for the week ending July 31, as compared with the previous week.

High Prices at Cattle Fair

The Brandon Cattle Fair had its usual success and bidding was keen and prices high. The highest price, Aberdeen Angus, "Blackbird of Glen-carroch," brought \$3,000, and won the Female Grand Championship. The animal was retained to Canada by a Bowden, Alta., ranger. In all 65 Aberdeen Angus and 83 Shorthorns were sold.

No surgical operation is necessary in removing corns if Holloway's Corn Cure is used.

Externally or Internally, it is Good.—When applied externally by brisk rubbing, Dr. T. J. Holloway's Electric Oil opens the pores and penetrates the tissue as few liniments do, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will cure afflictions of the bronchial tubes and respiratory organs. Try it and be convinced.

The Imperial canal of China has a length of more than 1,000 miles.

Used for 70 Years

Would Have Labor And Farmers Join In Political Group

Renfrew, Ont.—Two thousand citizens of Renfrew and the surrounding district gave a welcome to Hon. W. L. Mackenzie King. Many could not gain admission to the armories where he spoke.

Mr. King made a strong appeal to both labor and farmers to enter politics, but not to enter as a class, because, he said, if one class gained ground jealousy would be engendered in another class which would prove dangerous to both. He invited both parties to join forces with the liberals who, he said, were real democrats and ready to put into effect the lessons which war had taught. He advocated tariff reform and described as "disloyal" people who talked free trade at this stage of Canada's history. He advocated reduction of duties on necessities of life.

"The country is honeycombed with combines at the present time," he said, "and the government instead of trying to combat them, are playing into their hands." He also strongly criticized a party which changed its name, policy and premier without reference to the people. "Surely," he stated, "no one could allege they were being governed by the people."

Hon. Mr. King said no man lived a real and full life unless he took an interest in political life. The highest form of civilization was toleration and moderation and he felt proud that the mayor of Renfrew, a Conservative, had written the address which was presented him this evening.

"We are in Canada getting down to real democratic principles," he said "and Toryism, which is the reverse of toleration, now belongs to a past century." They owed much to the life-long service of the late Sir Wilfrid Laurier; Canadian people were now becoming one not only in national ideas, but in feeling.

Mr. King spoke at length of the essential differences between the Liberal and what he described as the autocratic or Conservative line of thought. The labor and farmer movements were but an expression of Liberalism in its true form. The work of Liberalism is to gather those who are out for a democratic government; those who are out for a better life, such as the returned soldiers. Those were things that Liberalism was trying to gather together to sweep like an ocean over the land, and give much needed improvements. The labor movement was formed to represent every branch of labor and give expression of labor all over the country. This was truly democratic.

The farmer movement came into being in a similar way. They started with the people themselves. Liberalism, he said, placed its trust in the people. They talked about government by the people, but they should also add for the people, and both these parties and the Liberals were out for this class of legislation.

Was there one person who could say they had a voice on either government, and yet they called it government by the people. From one end of Canada to the other, no one had a word to say as to the naming of the party, policy or premier, except the men in power themselves.

Any group of men able to draw to their side the strong financial parties and combinations, and give and accept favors between each other was an invisible government. They represent not the will of the many, but the desires of the few. The government has felt justified to resort to any means to hold the reigns of office.

On the other hand there were the democratic forces insisting on being heard. At the present time the country had been seized by an autocratic combination holding office against the wishes of the people of the country.

Peace Delegates Want Food

Warsaw.—The Polish peace delegates at Minsk are hungry. An urgent appeal has been received by the ministry of foreign affairs asking that food be sent immediately to the delegates.

As an indication that the Minsk conference may continue indefinitely, preparations are being made to send there five young women stenographers, who have been asked for by the delegates.

Horse Artillery Brigade

Vancouver.—The military authorities have taken possession of the horse show building on least in order to provide a permanent home for the 150th brigade of field artillery.

WIDE TRIBUNAL FOR MAINTAINING PEACE OF WORLD

INTERNATIONAL LAW COURT

Viscount Cave Advocates Standing Tribunal to Interpret and Administer the Law

St. Louis, Mo.—A plea for an international tribunal of justice to secure world order, freedom and peace, was made by Viscount Cave in an address before the convention of the American Bar association.

"It is surely time," the Viscount said, "that all the civilized nations should combine to set up a court of international law. The only way to an effective international law until there is some standing tribunal composed of men of outstanding ability who have the confidence of the civilized world and are authorized on the application of any nation aggrieved to interpret and administer the law."

"I hope that I am not too sanguine in believing that the foundation of such a tribunal were well and truly laid, on the first day of July last. I am in no way concerned today with a question which as I gather, is not at this moment in perfect harmony—but I mean the League of Nations. Let there be no mistake, this will come into effect and international law will elucidate it."

Warning against radicalism, Viscount Cave declared revolutionary trouble threatened England, but predicted England would "pull through."

Sir Auckland Geddes, British ambassador to the United States, in an address, pictured the Bolsheviks as enemies of Democracy. He prefaced his address with a denial of charges of Congressional Britain, Illinois, that Great Britain has appropriated approximately \$87,500 to be used in this country for democratic committee purposes.

NEWS OF THE PROVINCES

MANITOBA

Winnipeg.—During the first six months of this year 12,869 immigrants from Europe and the United States passed through Winnipeg on their way west, carrying with them more than \$5,000,000 in cash and goods worth about \$2,000,000.

Plum Coulee, Man.—Burglars who moved a small safe half a mile at Horndean, near here, secured only \$20 for their trouble. The safe was taken from the office of the Winkler Lumber Company, and was blown up half a mile away.

SASKATCHEWAN

Regina.—With the exception of a few districts, there is little shortage of harvest labor in the province, according to the provincial bureau of labor. In the Regina district all the vacancies have been filled and there is no shortage or congestion.

Saskatoon.—Bishop Franz Harder, of the Monastic church, was detained to serve thirty days in jail for refusing to obey the Saskatchewan school laws. He would not pay a fine of \$10, so the court ordered imprisonment.

ALBERTA

Calgary.—The Southern Alberta oil company, which has a 40-barrel-a-day well 45 miles southwest of Calgary, has declared a dividend of 15 percent. This is the third successive year that the dividend has exceeded ten percent. Its product is used almost exclusively for tractors.

Edmonton.—Harvest leave to all municipal employees, permanent or temporary, in all departments, time off to be without pay, was granted by His Worship Mayor on condition of his return to Edmonton after an absence of five weeks.

Edmonton.—Postal workers in conference here have decided on strict adherence to the 44-hour week.

BRITISH COLUMBIA

Victoria.—Names placed on the provincial voters' lists as a result of the recent registration number 202,017, or 45,000 more than the total of 1919.

Victoria, B. C.—So far this season there have been 754 forest fires in British Columbia costing the government more than \$71,458, according to the latest fire report issued by the government. "Conditions are coming what improved, but are still dangerous," the report says.

DESTRUCTION OF SOVIET ARMIES NOW COMPLETE

POLES TAKE 80,000 PRISONERS

Great Quantity of Guns and Ammunition Fall into Hands of The Poles

Paris.—The destruction of the Bolshevik armies now may be considered complete, according to advices received here. Of the host which swept down on Warsaw, nothing is left but 30,000 fugitives. The Poles have taken 80,000 prisoners thus far, but what is more important they have captured great quantities of guns and material.

During the past three days there has been heavy fighting in the marshy valleys of the Narw between Ostrolenska and Lomza, where the Reds sought to break through in the direction of Bialystok. The losses have been heavy on both sides. On August 23 the Poles carried all the passages of the river. The Prussian frontier as far as Mysyniec is now occupied by the Poles. All the Red troops west of the line of Ostrolenska-Mysyniec have been captured. The exact number of cannon abandoned is not yet known. Detachments of cavalry and infantry which escaped proceeded northward, along the line of the lakes and marshes between the fortresses of Ossowiec and Grodno.

Profiting by the re-grouping of the Polish army, the Reds again invaded Galicia. General Budyoni made a dash for Lemberg but has been defeated and is in flight. Another detachment crossed the Dnieper and occupied Strye. This detachment sought to destroy the Boryslav oil wells, but was driven off by local workmen. In the region of Cholm, a Bolshevik attack was repelled by troops occupied to the right of the Bug.

Great Britain Faced

With a Serious Crisis

Situation in England is Clouded With Political and Social Dangers

Montreal.—In an interview here, Lord Beaverbrook, proprietor of the London Daily Express, who has just arrived here from New York, stated that the threatened coal strike was incomparably the most important question in England today.

"Here we are faced with the most serious crisis in the world's history," he added that no one seriously doubted, but that the strike would take place, and that the situation in England was big with political and social dangers. He stated that Premier Millerand's prestige had been increased immensely by the Polish victories and that he now dictates the policy of the Allies.

Necessity of Conserving Fish

Vancouver, B. C.—That he fully appreciated the necessity of conserving the fish of the Pacific Coast by all means possible, though he did not favor handing the administration of the British Columbia fisheries over to the federal government, there was the assurance which Hon. C. C. Balantyne, federal minister of marine and fisheries, gave Hon. William Sloan, minister of mines and commerce for British Columbia, during a conference with the fisheries minister.

Unemployment in East

Hamilton, Ont.—There is more unemployment in this city now than for many months. Many men are coming here from outside points seeking for work, but without success. It is said that there is even more female help available than there is employment for in offices and factories, but the supply of domestics is below the demand.

Purchase by Manitoba Farmers

Winnipeg.—One of the most important farm land deals negotiated for some time in Manitoba has been concluded. Senator Aime Beaud and F. Lafleche acquired the Strathearn farm, for \$130,000.

The farm, which consists of 2,500 acres all in crop, is situated at Caline, 15 miles west of Winnipeg.

Lower Prices for Flour and Bread

Montreal.—It was stated by a leading milling expert here that when the new western crop started to move, a new price list for flour and other products would likely be issued, with a probability of a downward trend in the cost of bread to the consumer.

W. N. U. 1331.

Serious Rioting And Disturbances Staged at Belfast

Turgeon Speaks at Regina

Criticizes Present Government and Premier's Speech at Stirling

Regina.—Hon. W. F. A. Turgeon addressed a large gathering here on the question of the tariff, dealing particularly with Premier Meighen's recent speech at Stirling, Ont. Mr. Turgeon spoke for two hours and was accorded a good hearing. He took the stand that the Premier's speech was a direct challenge to the west on the tariff issue, and strongly criticized the new government's position.

"Mr. Meighen says he sees among his followers those who stand by British institutions and things of that sort," said Mr. Turgeon, "and on the other hand he sees those who would destroy them, 'wreckers,' as he calls them. I do not agree with Mr. Meighen at all. On the important thing which is the meat of his discourses, on the question to which all these things lead—that is to say the tariff policy of Canada—I do not agree with him at all. I feel I am just as much attached and just as loyal, and so are those around me, to British institutions and methods and forms of government as Mr. Meighen; just as much and greatly more attached to that most fundamental of all British government—representative government and faith in the people. That, perhaps, is the outstanding characteristic of the government of the day. Why does it not consult the people? We all know how the members of that government came into being in 1917 for a specific purpose. There was a full understanding that that purpose being accomplished, that government would come to an end. Has it? The mandate has long gone by. On what authority is the present government carrying on? Mr. Meighen admits they are carrying on. He says we are not a new government; we are born and bred from the old government, a continuation of the same regime; we are carrying on. Under what mandate? Mr. Meighen talks of British institutions and methods. Does he imagine for one moment such a state of affairs could obtain in England? The government that goes to the people when they know their mandates have expired."

During the past three days there has been heavy fighting in the marshy valleys of the Narw between Ostrolenska and Lomza, where the Reds sought to break through in the direction of Bialystok. The losses have been heavy on both sides. On August 23 the Poles carried all the passages of the river. The Prussian frontier as far as Mysyniec is now occupied by the Poles. All the Red troops west of the line of Ostrolenska-Mysyniec have been captured. The exact number of cannon abandoned is not yet known. Detachments of cavalry and infantry which escaped proceeded northward, along the line of the lakes and marshes between the fortresses of Ossowiec and Grodno.

Profiting by the re-grouping of the Polish army, the Reds again invaded Galicia. General Budyoni made a dash for Lemberg but has been defeated and is in flight. Another detachment crossed the Dnieper and occupied Strye. This detachment sought to destroy the Boryslav oil wells, but was driven off by local workmen. In the region of Cholm, a Bolshevik attack was repelled by troops occupied to the right of the Bug.

Dealing With Soldiers' Problems

Well Over A Million Cases Dealt With by S. C. R.

Ottawa.—Some interesting details of the work of the soldiers' civil-re-establishment department are furnished in a statement just issued. The total number of enquiries and problems dealt with and directly affecting men under the scheme, is 1,218,472, and this, up to the present time.

It is expected that before the bulk of the work is completed, which will be about the end of the present year, this total will run to one million and a half.

It is expected that before the bulk of the work is completed, which will be about the end of the present year, this total will run to one million and a half.

The statistics show that the total number of men who have received medical treatment with pay and allowances is 49,369, the total number of clinical treatments is 422,235 and the total of dental operations is 84,576.

Intoxicated Driver's Severe Sentence

Hamilton.—Wilfred Perry, of Toronto, arrested on a charge of being drunk while in charge of an automobile, was severely punished by Magistrate Jeffs.

He was fined \$20, and sentenced to 30 days on the first count, and for having a bottle of liquor in his possession he was sent down for three months without the option of a fine.

Successfully Plug Gas Well

Calgary, Alta.—The gas well of the Canadian Cement company, which has been blowing wild for five or six years, has been finally plugged by officials of the mining lands, and Yukon branch of the Dominion government, after efforts of noted engineers from all over the continent had failed. Over 5,000 cubic feet of mud was pumped into the well.

Belfast.—Serious rioting broke out in Belfast during which there was considerable shooting and some incendiarism. A number of wounded persons were taken to the hospitals.

The rioting began in the Falls district of West Belfast, the scene of the deadliest fighting in the July disturbances. It started with revolver firing near the Kashmir road, of Evelmorris. Albert street, in the Falls area, situated in the populous mill locality and mainly inhabited by nationalists, became the new storm centre. During the night an armored car appeared and fired on the rioters, a number of whom were taken into hospitals suffering from machine-gun wounds.

Crowds of shipyard workers appeared from the side streets warning Union Jacks. The military was heartily cheered, as a section of the fire brigade, which was summoned for an incendiary fire, a few minutes after the fire started the whole block of buildings was a seething mass of flames. Early today Sinn Feiners in Ballymacarrat fired on the military, who returned the fire, Frank McCann was shot dead and another man was wounded.

Omagh, Ireland.—While a fair was in progress at Drumquin, about seven miles north-west of Omagh, a party of armed Sinn Feiners dashed through the village in motor cars and opened fire on a small force of police controlling traffic, wounding two of the men.

A sergeant in command was badly wounded and a constable received critical injuries, from which he died later. After the opening dash, the raiding party turned its attention to the barracks, the remainder of the police were striving to defend. After a long and futile siege the Sinn Fein departed.

A large military force was dispatched to the scene from Omagh, but arrived too late to be of any assistance.

End of the C.E.F.

Will Carefully Preserve All Documents Relating to Ex-Members Of The Army

Ottawa.—The Canadian expeditionary force is no more.

The fourteen B.C.'s who were employed to conclude the statistical work of the army have written "30" on the concluding page of a mass of records covering every unit and every man who ever donned a Canadian uniform. Just the number of records kept of every individual man would come as a surprise to even the soldier whose records they are. The militia department has original and duplicates of about twenty-one army forms relating to every one who served. Asked what was going to be done with the thousands of apparently useless books and army forms, a militia department official stated that they would be carefully preserved and locked away.

Prices Reach The Limit

Toronto.—In addition to about 250 thousands grocers from various points in the Dominion at the opening of the annual meeting of the Canadian Wholesale Grocers' association here, there were also present twenty representatives of manufacturers' firms that are closely allied to the grocery jobbing trade.

Hugh Blain, of this city, president of the association, stated that he believed the prices of necessities had reached the peak, unless further demands from workmen for increased wages were made. He denied that the association was a combine, as had been alleged before the board of commerce.

Openings For Canadian Cadets

St. John, N. B.—Military headquarters here reports that a limited number of vacancies at the Royal Military academy, Woolwich, and the Royal Military College, Sandhurst, England, have been allotted to the Canadian government for nominations. Ages are between 17 and 18.

500 on Strike Over \$5 Dispute

Sydney, N. S.—Because of a dispute over an employees time-sheet, involving a sum of about five dollars, 500 miners are on strike at Glace Bay, and No. 9 colliery, one of the most important producers of the district, is idle.

LIST OF PRIZE WINNERS AT THE FAIR

(Continued)

Fancy Work

Best crochet hand-bag, Mrs.

McLaughlin.

Tea cosy, embroidered, Mrs.

Whitlock, 1st; Mrs. Waterhouse,

2nd; Mrs. Rideout, 3rd.

Child's frock, hand made, Mrs.

Whitlock, 1st; Mrs. Waterhouse,

2nd; Mrs. Massey, 3rd.

Lady's apron, hand made, Mrs.

J. W. Lawrence, 1st; Mrs. Whit-

lock, 2nd; Mrs. Waterhouse, 3rd.

Collection sofa cushions, Mrs.

J. W. Lawrence, 1st; Mrs. Whit-

lock, 2nd; Mrs. J. Ferguson, 3rd.

Crochet wool hat or tam, Mrs.

Whitlock.

Collection drawn work, Mrs.

T. H. Bradford.

Mat, any kind, hand made, Mrs.

J. N. Key.

Buttonholes, 6 best, Mrs. Water-

house, 1st; Mrs. A. E. Roberts,

2nd; Mrs. Whitlock, 3rd.

Hemstitching hdkchief, Mrs.

Whitlock.

Knitted wool slippers, Mrs.

Whitlock, 1st; Mrs. Nicholson,

2nd.

Crochet wool slippers, Mrs.

Waterhouse.

Embroidered pillow cases, Mrs.

Lawrence.

Embroidered guest towels, Mrs.

Waterhouse, 1st; Mrs. Whitlock,

2nd.

CANADIAN NATIONAL RAILWAYS

The Noble Foundation Said to be the Largest Grain Farm in the World

To stand in the midst of a single field of wheat and see nothing but wheat as far as the eye can see, to see dozens of binders tearing through the greatest single stand of grain ever seen in the west, is the experience of anyone who visits the Cameron ranch, the Noble Foundation, 20 miles north-east of Lethbridge, Alberta, while cutting is in progress on the 9,000 acre wheat field.

Three years ago this immense field of grain was laid out in grain, now it is yielding up its first big harvest of wheat at an average of between 25 and 30 bushels to the acre over the whole area. C. S. Noble, who heads what is known as the largest grain farming company in the world, started years ago with half a section of land—320 acres. Today his holdings total 33,000 acres on all his farms, and he has a clear title to every acre of it. Of this area he has 28,680 acres cultivated, 712 are unbroken and 3,680 are used for grazing purposes. This year he has 18,287 acres in crop in all grains. Of this, there is 12,310 in wheat, 2,290 in oats, 3,517 in rye and 70 in flax. He has shown his faith in winter grain as a means of combating soil drifting by planting a great deal of it. He has one of the 100 acres of volunteer rye which yields eight bushels, another field of 1,000 acres of volunteer rye which ought to yield more, 70 acres of rye that will yield 21 bushels, and 80

acres that will yield 25 bushels. He also has 20 acres of Rensen rye that will yield 30 bushels.

The majority of the crops this year are on what is known as the Cameron ranch, where there are 9,000 acres in wheat, 2,300 acres of rye, 1,500 acres of oats and 70 acres of flax. It is expected that the total acreage will yield 307,350 bushels of wheat, 137,400 bushels of oats, and 70,340 bushels of rye, worth roughly about one million dollars. To harvest this immense crop 60 binders are at work, using 240 horses in addition to the enormous number of helpers required to carry on the necessary work.

To save a fifteen mile haul from ranch to railway, Mr. Noble has established a unique system of conveying his wheat over the valley of the Little Bow River, two miles away, by aerial tramway to the south side, where another three miles will put the grain into the elevator he has purchased.

A huge granary on the slope of the coulee at the Old Man River has been built with a capacity of 90,000 bushels. As the grain goes into this it comes out at the foot in a chute which carries it into a huge carrier across the river. This carrier has a capacity of one ton. The grain goes into a hopper on the other side from which chutes lead it into wagons, the whole operation being done by gravity.

Experiments in Swine Feeding

Self-Feeder Proves More Economical Than Trough Method

Experimental work with swine has been underway on the Scott Section for three years. The list of experiments includes a comparison of the methods of housing, comparison of feeds and methods of feeding and determining the value of pasture.

One of the first points noted in examining the data collected is that swine raising and feeding has proven profitable during this period, notwithstanding the high cost of feed and labor. Out of all the experiments tried out only one has shown a direct loss and this was due to poor ventilation in the building in which the hogs were housed and consequent illness.

The information secured indicates that profitable gains can be secured by the use of the self-feeder. In most of the experiments the self-feeder has resulted in more economical gains than the trough method. The conclusion reached is that where the feeder is an expert in his business he can secure equal gains to the self-feeder method, but where the feeder is not well versed in the art of feeding then the self-feeder method permits the hogs to use sufficient quantities of feed to permit vigorous growth.

The matter of pasture for swine is a debatable one. It is possible that very young pigs will make more rapid gains if green feed is cut and fed them than if they have the run of a large pasture. On the other hand, the cost of maintaining broad acres can be substantially decreased by the use of pasture.

A comparison of wintering swine in a large central building with that of having the swine in small portable cabins has shown the small cabin to be the most profitable since it is an exception to have stifened chronic pigs in the small cabin while in a large central pigsty this frequently occurs. Proof shows that have wintered in portable cabins some distance from the feeding trough have always produced good strong vigorous litters.

A point that has shown up particularly during the last few years is the importance of having grain of good quality for feeding. This is more important than most people realize. That the feed plays an important part was shown by the experiment conducted this past winter when barley and oats were fed in direct comparison with standard screenings and oats, and shorts and oats. The feeding value of the first material was considerably superior to either of the other two. While the shorts and oats produced the least economical gains.

Owing to the high prices usually prevailing in April and May for fat hogs early fall litters wintered in straw sheds or in portable cabins have in the two winters they have been tested out given profitable returns. These pigs were raised under conditions similar to those existing on the average farm, that is no milk was available and the feed consisted of water and grain, with what shavings for roughage, and when available roots were given. While the pigs usually did not make very rapid gains during the extremely cold weather they filled out rapidly once the warm spring weather set in, and a couple of weeks of the self-feeder resulted in wonderfully rapid gains.

In conclusion it might be pointed out that swine raising, like all other lines of business, must be consistently and carefully conducted. Much of the loss in this branch of farming in the past has been due to farmers and others going into the business for a comparatively short time and at the first sign of a slump in the market disposing of their entire stock.

MILTON J. TINLINE,
Superintendent,
Scott, Sask.

Floods at Lesser Slave Lake

Water Does Serious Damage to Hay Lands in the North

Thousands of acres of hay lands in the region of Lesser Slave Lake is covered by several feet of water, and the danger of this vast expanse of stock feed being ruined is apparent, according to J. A. McGregor, general manager of the E.D. and B.C. Railway.

The situation caused by the Lesser Slave Lake rising fully five feet above normal level is a serious one, says Mr. McGregor, and fully warrants immediate action in Sawridge. The water is well into the town of Sawridge, while a portion of Grouard, on the opposite side of the lake, can only be reached by boat.

The less work a man does the more he tires other people.

Beaver Ranching In Canada

High Prices of Furs Results in the Domestication of the Beaver

The conservation of wild life on the continent and the domestic cultivation of wild animals for their furs has of late been receiving widespread attention and encouragement both on account of the high prices prevailing and because it tends to offset the natural depletion by trap, gun and disease. The ceding of a thirty-year grazing lease to Viljamur Stefansson on the southern portion of Baffin Island, to raise reindeer and caribou is an indication of this, while the formation of muskrat farms has been much advocated on account of the profitable nature of the industry, a prominent factor of which is the economic maintenance of such an industry.

The rapid decline of the beaver throughout the continent and consistent high prices for the furs of these animals have drawn attention in their direction, and the feasibility of domesticating the beaver, or rather cultivating the animal in a wild state under domestic restraints, is receiving much consideration. A beaver ranch was established last fall on the ranch of H. Coles, a farmer of Milton, Prince Edward Island, his first pelts selling for \$40 to \$60 apiece. The location for the ranch was an admirable one—the animals' natural haunts—abundant flowing water and an ample provision of natural sustenance. The busy little animals went right ahead with their dams; the special wire fencing used to enclose them and prevent possible migration did not apparently annoy them to any extent, and they continued to propagate and follow out their regular routine as if unhampered by the beaver of man.

The beaver, which was early recognized as typically emblematic of Canada from its ubiquitousness, found a permanent memorial on the national insignia, and at one time was to be found in every part of the Dominion. It usually disappears with settlement, however, and statistics go to show that the supply of beaver in the wilds is rapidly diminishing, and that in a matter of twenty years will, unless conserved by the establishment of farms, have followed the buffalo into practical oblivion and extinction.

Beaver ranching is an industry which would receive every encouragement. The trapping of beaver has always been a profitable pursuit while the high price of the fur which will doubtless hold, is sufficient encouragement. Given a careful choice of location, a ranch is an economy of operation and can be profitably run on lines of little expense, after the initial outlay.

Japs Carving World's Largest Statue

Will be Reclining Figure 240 Feet Long

On the Isle of Cow's Head, in that beautiful inland sea, which has been called the Mediterranean of Japan, a ledge of rock overlooks the water, and here a small army of Japanese workmen are busy at the first cuttings that will eventually carve out the largest statue in the world. The Colossus of Rhodes, at one time one of the seven wonders of the world, is said to have been 120 feet high—a small thing compared with the figure of Liberty that stands 151 feet above its pedestal in New York harbor—but the Japanese statue will be of even greater magnitude. Following the line of the natural rock it will be a reclining figure 240 feet long, and therefore that much more impressive than the Buddha at Pagan, Burma, which from head to foot measures 182 feet. The Isle of the Cow's head is private property, and this Brooding-nagian adornment is a work of private enterprise. The reclining figure will be that of St. Nicholas, who founded the sect of Buddhism that bears his name. In the wooden model of the statue, the face of the figure, ever seen him, his head pillowed on a block, and his left arm extending along his side; a somewhat archaic figure, yet with considerable realism. For the enormous statue that is to be cut out of the solid rock from the model the trees and greenery of the Isle of Cow's head will provide an excellent setting.

Advantage of Depreciated Currency

Because currency has become so depreciated and the price of farm products so high in Hungary, a farmer can pay off the mortgage on his land by the sale of one calf, according to a report to the department of commerce from a trade representative at Vienna. About 20 percent of the farm mortgages have been paid off in depreciated currency since the war, thus enriching the peasants at the expense of the middle class.

Polcel
"Oh, Clarice, I'm so worried! You know you told me to put that piece of wedding-cake under my pillow and I'd dream of my future husband?"
"Yes, dear, did it work?"
"That's what worries me. I dream of the Seventy-first regiment."

Norwegian and Danish languages are almost similar save in pronunciation.

Heavy Decline in Wheat Growing Shown Since Pre-War Days

The average world's yield of wheat the war years 1914 to 1918 is ascertained to be 98.3 million metric tons, a quantity slightly below that of the average five years when the average crop was 100.6 metric million tons. Says a recent communication from the International Institute of Agriculture, Rome. It might appear from the respective aggregate that the war had not seriously affected wheat-growing, but in reality matters are quite otherwise. The official data published by the Institute record the profound influence of war with regard to cultivation alike in Europe and in other continents. Such attempts as were made by European governments to insure adequate crops proved unsuccessful. In spite of all inducements offered to farmers, and of the many obligations imposed upon them, with the view of keeping up the wheat area, there was a decrease from 130,000,000 acres in 1913 to 112,000,000 in 1918, and from an average of 130,000,000 during 1909-13 to 114,000,000 during 1914-18. In other words, a decline of about 10 percent. The data of yields indicate a decrease even more serious than this.

While the aggregate yield in 1913 was 57.5 million metric tons, the figures show sharp declines, to 41.3 million tons in 1918, while the average of 52,000,000 million during the five pre-war years decreases to 41.6 million.

For the five season of conflict, or more than 10,000,000 (20 percent) below the previous crops. The gravity of this situation as regards Europe was fully appreciated overseas, and with one accord every region entered in order to save from hunger hundreds of millions of war-worn people, doing its utmost to furnish Europe with its indispensable requirements. Thus we may observe that North America increased its wheat area from the pre-war average of 35,000,000 acres to about 70,000,000. Asia advanced from 45,000,000 to 53,000,000, and Australia from 7,000,000 to 10,000,000, with a corresponding increase in the average yields. Those of North America surpass the pre-war figures by 5,000,000 metric tons; in South America the increase was 500,000 tons, in Asia 2,000,000, in Australia 500,000 tons. Natural causes, such as climate and surroundings, combined to prevent Africa from following these examples, but the yields in that continent remained at pre-war level.

We may summarize by remarking that the decrease in average European yields during the war period is about 10,000,000 tons, but is almost balanced by an average increase of 8,000,000 tons in other countries, and that the net annual deficiency was therefore no more than 2,000,000 tons, a quantity which is in practice inappreciable.—Toronto Globe.

Lignite Development In Saskatchewan

New Company Incorporated as the Western Collieries, Limited

A company capitalized at \$500,000, has been organized for the purpose of developing a part of the Saskatchewan lignite fields in the Estevan district. The new company has been incorporated in the province as the Western Collieries, Ltd., and arrangements already have been made for the commencement of operations.

The company has secured an area of 630 acres at Rocher Perce, nine miles southeast of Estevan. The addition to its coal mining operations at that point it is proposed to establish a large brick pressing plant which will be operated during the summer months and to help to keep the labor of the mines engaged throughout the entire year.

According to government reports there is in this district some of the finest clay in the world suitable for brick making. The slack lignite coal will be utilized in the burning of these bricks which it is estimated will allow of economical production.

Distribute Season's Fish

Dominion Government Hatcheries Distribute Fry in Manitoba And B. C. Streams

The fisheries branch of the department of marine and fisheries of the Dominion government announces that the Manitoba hatcheries have completed distribution of fry for the season, the total liberated numbering 226,468,500. Of these 25,353,000 were pickered and the balance whitefish. With some few exceptions, the distribution of fry has also been completed in British Columbia. In that province, 114,479,487 fry have been liberated, chiefly of the various species of salmon. There were also approximately 740,000 of Kennerley's salmon fry distributed within British Columbia.

A Quiet Supper Partner

The evening party was over and most of the guests had gone, so the story goes. As one young man took leave of the hostess the lady said: "I'm sorry you found Miss Biggle a poor conversationalist!"
"Poor conversationalist!" exclaimed the guest. She's absolutely the limit. Why, the only thing she said to me during the entire evening was 'No,' and I had to propose to get that out of her."

The farm family, because of its comparative remoteness from the turmoil and distractions of the city, has wonderful opportunities to make a real home. Among these opportunities is that of beautifying the farmstead so that it may be more attractive to the occupants. This will tend to make both young and old more contented, will add materially to the enjoyment of those who pass by, and incidentally to the selling value of the farm.

Experiments With An Eighty-Day Wheat

Well Suited to Districts Where Any Other Varieties Have Not Been Successful

A new pearl white wheat called "Quality" wheat which ripens in 80 days, is being grown very successfully at Douglas, Manitoba by W. J. Whitley who is very enthusiastic over its possibilities, and in this new wheat believes that he has wheat that will set a new standard for Canadian grains. In any event it appears to be very well suited to certain districts where other varieties have not been so successful. The wheat is adaptable to any climate it is claimed, and can be successfully grown in a light dry soil. It most resembles the hard Northern wheat, "Prize Marquette," but has a vitreous white berry of quite different appearance and quality. The heads are of medium size, tapering to a point, beardless, and on ordinary land stand three and a half feet high.

Mr. Whitley has a new kind of barley which thrives out exactly like wheat. He has also had considerable success with white flax seed which has yielded twelve percent more oil than ordinary flax, and the seeds are nearly double the size of ordinary flax.

A Suburban Millionaire

Says Idle Rich are a Curse to Society And Humanity Alike

In a small villa at Forest Hill, near London, lives a millionaire without servants or assistants, his wife doing all the housework. He is Mr. G. L. Moore, who, beginning life as a solicitor's clerk in Belfast, ultimately went to London and carried out numerous financial ventures.

Everything he touched turned to gold, and today he is interested in two hundred and fifty different companies, all yielding magnificent profits. Mr. Moore intends to devote his wealth to philanthropic purposes, and recently offered £150,000 for a Victory Park. He is determined to die poor.

Wealth has left him quite unshaken. He still gets up at three o'clock every morning, works in the city all day, and goes to bed at seven-thirty. "Rich people who live a pampered life are a curse to humanity and society alike," is the view he holds.

The Farm Family

The farm family, because of its comparative remoteness from the turmoil and distractions of the city, has wonderful opportunities to make a real home. Among these opportunities is that of beautifying the farmstead so that it may be more attractive to the occupants. This will tend to make both young and old more contented, will add materially to the enjoyment of those who pass by, and incidentally to the selling value of the farm.

W. N. U. 1331.

Alberta's Telephone Service

Rural Business Has Grown by Leaps And Bounds

Within the next three months a thousand new phones will be added to the city telephone exchange of Calgary, Alberta. During the past six months the exchange has not been able to expand sufficiently to keep up with the increased demands of new subscribers. New equipment, however, is now being installed which, when completed, will allow an additional thousand instruments to be put into use. It however appears that still further extensions will have to be made shortly since there are now sufficient subscribers on the waiting list to absorb the greater number, if not all the additional telephones the moment they are ready for service.

If the growth in city phones has been small, because of lack of equipment, the growth in rural services has been very large. The new directory of Calgary and district shows 21 new rural toll stations opened up since the last directory was issued, and five additional rural toll stations west of Red Deer taken over by the government.

The rural business has grown by leaps and bounds," states the officials in charge of the district. "There are more than a score new toll stations shown in the new directory and within a month there will be as many more ready to open. It is difficult to estimate what the actual increase in individual services is in this district, since the work on the various toll lines is not complete. The gangs are working with all speed to complete the new lines and by fall the number of additional rural services will be very great."

The new toll offices opened in the Calgary district, which included from Red Deer south to Carmangay, and Claresholm, are as follows: Patricia, Mayfield, Watts, Del Bonita, Valleyfield, Harker, Ranter, Judson, Legend, Skiff, Conrad, Wrenham, Carolside, Crossford, Halliday, Rooke, Rose Lynn, Sherrness, Sunny Nook, and Almont.

Canadian Coal For Europe

A ship recently left British Columbia for Sweden with 4,500 tons of coal and it is expected that, owing to the embargo on Atlantic ports, there will be further large shipments from the Pacific if bottoms can be secured. The Canadian Collieries at Nanaimo, B. C. which shipped this coal, are in a position to export large quantities and, with the prices obtainable in Europe, will likely do so. At present prices of coal in British Columbia are lower than anywhere in the world, it is claimed.

12,000,000 Pounds of Butter

The production butter in Alberta in 1920 will, in all probability, reach twelve million pounds, W. W. Prevey, one of the leading creamery men in central Alberta predicts.

Some people like the town without doing very much to make the town like them.

Potato Crop Larger Than Last Year

Bigger Total Yield Expected Owing to Increased Acreage

The Dominion Bureau of Statistics reports the area sown to potatoes this year as 819,000 acres, as compared with 818,767 acres in 1919, and the condition of the crop at the end of June as 98 percent as against 95 percent in 1919.

During July the weather has been favorable to potato growing in British Columbia, Ontario, Quebec and Nova Scotia, and during the latter part of the month, in Alberta, New Brunswick and Saskatchewan, which may be taken as an indication of an improvement in the condition of the crop in these seven provinces. In Manitoba and Prince Edward Island only, the weather has been such as might be expected to reduce the possibilities of the crop yield.

Taking the latest potato crop report for the Dominion as a whole, the prospects appear good for a considerably bigger total yield than last year. Considering their increased acreage, and condition of the crop at this date, the provinces of British Columbia, Ontario and Quebec have splendid prospects, while the noted potato-producing provinces of Prince Edward Island and New Brunswick are behind their usual form. Saskatchewan has 20 percent more land in potatoes than last year and the yield is estimated from 200 bushels per acre on stubble to 400 bushels per acre on summer fallowed land.

A peculiar feature of the season has been the distribution of the potato beetle pest. The beetles have been abundant in Quebec and Manitoba, scarce in most parts of Ontario, but abundant in the southwestern part of that province. In the Maritime Provinces the potato beetle is now reported as very abundant all over the inland territory, but scarce along the sea coast.

Canadian Trade in Europe

Sir George Perley Says Outlook Was Never So Bright

Great Britain is having her troubles and lots of them, but she will pull out all right and maintain her smile upon civilization, is how Sir George Perley, Canadian High Commissioner in London, expressed himself to the Canadian Press, on his return from the Old Country with Lady Perley.

"The sound common sense of the British people in the old land is simply wonderful. They take their troubles philosophically and have managed everything exceedingly well during these trying months since armistice days. Last year when a railway strike broke, they just set to work and became their own railway men and soon the strike was ended," he said.

Sir George was extremely pleased with the changed position regarding Poland. Along with other prominent men who were with him, he expressed the belief that the new turn of events would result in the mix-up between the Bolsheviks and Poles being soon straightened out much quicker than if the Reds had reached Warsaw.

Asked regarding Canadian trade in Europe, Sir George said the outlook was never so bright. He strongly counselled Canadian merchants to buy every possible dollar's worth of goods in Great Britain rather than in the United States. This, he said, would have a double advantage, in that it would strengthen Empire relations and also offset the Exchange situation.

Paper Clothing

"So it's clothing made from paper that we want to bring into this country?" said Alice, the Seneca street tailor, when interviewed on the subject. "You don't tell me? Vot a nice little joke on us, eh? Baybe they think they will put us out of business, if you ask me I'll tell you that the American people will stand for no such monkey business as paper clothing. It's allright for the poor people of Kalamazoo, but no even in America will buy \$2 paper suits ven dey can get all wool vuns made out of cotton for a hundred."

Good Reason

"What reason have you for saying that the defendant was intoxicated?" "Well, your honor, when his wife called me over I found him in the cellar trying to split kindling with the lawn mower."

Your Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind are relieved by Murine Eye Remedy. No Smarting, Just Eye Comfort. Ask Your Druggist or by mail 50c per Bottle. For Bulk of the Eye free write to Murine Eye Remedy Co., Chicago.

Finest Thing Ever For Chronic Catarrh!

Gets Away From the Medicine Habit, Cures by Novel Method

With the many remedies you have tried you surely know that no liquid medicine can cure throat, or nose. Even a gargle only bathes the entrance of the throat—it can't really get inside, nor can it reach the inflamed bronchial tubes.

With Catrozone it's so different from medicine-taking — you simply breathe its healing vapor, inhale its balsamic fumes, which carry cure and relief to the minutest air cells in the lungs, nose, throat, and bronchial tubes.

In this scientific way the soreness and inflammation is rapidly allayed, relaxed cords are toned up, the entire mucous membrane invigorated. Every trace of catarrh disappears, the disagreeable dropping of mucus in the throat, hawking, spitting and stopped-up nostrils — all these sure signs of catarrh and bronchitis are permanently cured by Catrozone. Large bottles last two months, costs \$1.00; small size 50 cents, trial size 25 cents, at dealers everywhere.

Trade in Canada Not Slackening

Manufacturers Report Improved Efficiency On Part of Labor

The Canadian Bank of Commerce, in its monthly statement, says:

There are no signs of a general slackening in external or internal Canadian trade, although political developments in Europe do not presage an early resumption of normal trading between Canada and that continent. A further decline in the price of wheat, wool and a few other commodities has naturally made buying more cautious, but in the domestic situation there is no lack of confidence. Manufacturers in many centres report improved efficiency on the part of labor, indicating a trend in the direction of more normal conditions. By relinquishing its control of the wheat market, the Dominion government has shown its belief that the usual method will be found adequate for the handling of this season's crop of cereals, which promised to be above the average.

Orders by Pigeon Post

English Butcher Uses Pigeons To Carry Orders to Shop

An entirely practical use of homing pigeons is reported from England. The inventor of the system is a butcher's son, who employs his birds regularly to carry orders from outlying districts — presumably where there are no telephones — to his father's shop. The plan works excellently.

When the boy goes to collect orders he takes six of his fastest birds with him. After he has gone a mile or two and collected a dozen orders he liberates a pigeon with the slips enclosed in a little metal case attached to the bird's foot. Before five minutes have elapsed these orders are in the shop.

At the various stages of his round, which usually takes three hours, the other birds, with more orders, are set free, and by the time the shop is reached all the orders received by this pigeon post have been despatched.

Inoculation for Influenza

Sure Preventative Says Sir Kenneth Goadby, Prominent Bacteriologist

That medical science was aware that there would be a second influenza epidemic in 1918 and that steps were taken to guard the soldiers against it, with signal success, by the means of a special method of inoculation, was the statement of Sir Kenneth Goadby, prominent London bacteriologist, on his way to Boston where he is to lecture on latent infections.

He added that the deadly nature of this epidemic is due to certain microbes which can easily be rendered comparatively harmless by simple inoculations, and that if this method were adopted at the beginning of any epidemic the mortality rate would be greatly decreased.

Record Fields of Rye

A field of rye has just been threshed in Southern Alberta which averaged 49 bushels to the acre. This yield was obtained from 60 acres. This is the largest field of rye to have been reported in that district. At the present price at which this grain is selling, namely \$2.02 per bushel, the crop is worth practically \$100 an acre.

W. N. U. 1331.

German Cities Without Cars

Public, Unable to Pay the Price Took To Walking

Owing to the enormous increase in the cost of operation, street car service in many of the smaller German cities has been discontinued. Jena, Wuerzburg, Freiburg, and Heilbronn are among the towns trying now to get along without trams. Attempts were made to keep the lines going by radical increases in fares, but the public, unable to pay the price, took to walking.

Berlin and other large cities, where street car traffic has fallen off alarmingly because of the increased fares, are facing the problem of reorganizing the service, retaining only those lines which are absolutely necessary for the accommodation of persons having to travel long distances. Wagons and carts brought out to give a lift to pedestrians during recent strikes of street car employees have indicated which routes through Berlin are vital for transportation.

St. Isidore, P. Q. Aug. 18, 1894. Minard's Liniment Co., Limited. Gentlemen,—I have frequently used MINARD'S LINIMENT and also prescribe it for my patients always with the most gratifying results, and I consider it the best all-round liniment extant.

Yours truly,
DR. JOS. AUG. SIROIS.

Plan Revolution for Austria

Russian Soviets Spreading Trouble in Central Europe

Soviet Russia is preparing to foment a revolution in central Europe, scheduled to take place in October. Lincoln Steffans, chief propagandist of the soviet government has arrived in Vienna, accompanied by soviet commissioners.

They have been commissioned to create headquarters in the Austrian capital, from which all the propaganda of the revolutionists will be sent, and which ultimately will become the headquarters of the revolution itself.

These reports are brought back to Paris from Vienna by Americans who say that Steffans is making no secret of the fact that Austria is expected quietly to turn Communist. When this is accomplished, he is quoted as saying, the revolution will spread to Czechoslovakia, Rumania, Hungary and from the latter country into Germany and even further west.

GIRLS! DRAW A MOIST CLOTH THROUGH HAIR

Let "Danderine" save your hair and double its beauty.

Oh, girls, such an abundance of thick, heavy, invigorated hair; a perfect mass of wavy, silky hair, gloriously fluffy, bright and so easy to manage.

Just moisten a cloth with a little "Danderine" and carefully draw it through your hair, taking one small strand at a time; this magically removes all dirt, excess oil and grease, but your hair is not left brittle, dry, stringy or faded, but charmingly soft, with glossy golden gleams and tender lights. The youthful gleams, tints and color are again in your hair.

"Danderine" is a tonic-brandier. Besides doubling the beauty of the hair at once, it checks dandruff and stops falling hair. Get a little Danderine for a few cents at any drug or toilet counter and use it as a dressing and invigorator as told on the bottle.

Aeroplane as Ambulance

The value of the aeroplane as an ambulance was demonstrated at Camp Borden, Ont., when Lieut. Townley, a member of the instructional staff and a former overseas flyer, was conveyed from the camp to a Toronto hospital in forty minutes. Lieut. Townley, while engaged in some work at the camp, started an old wound, necessitating medical attention. The camp doctor, himself an experienced flyer, had the wounded officer placed in a machine, which he then piloted to Toronto.

Reclamation Projects

Half a Million Acres of Land Being Reclaimed

Forty reclamation projects involving 400,000 to 500,000 acres of land are planned in Alberta and Saskatchewan, and surveys are being conducted to determine the cost and means of bringing water covered areas into agriculturally useful surfaces. Several lakes will be drained as well as certain low-lying stretches in the Lesser Slave Lake district, in Northern Alberta. The scheme will also embrace inundated areas east of Prince Albert, Saskatchewan and a 1,000-mile tract between the Carrot and Saskatchewan Rivers, will be surveyed.

Why is the average man more polite to people he never expects to see again than to those whose good opinion is worth cultivating?

Let Cuticura Be Your Beauty Doctor

The Soap To Purify Ointment To Soothe

Let Cuticura be your beauty doctor, one that really does something to purify and beautify your hair and skin. Bathe with Cuticura Soap and hot water to cleanse the pores. If signs of redness, roughness or eruptions are present, or dandruff on scalp, touch gently with Cuticura Ointment before bathing or shampooing. For every purpose of the toilet, bath and nursery Cuticura Soap and Ointment are ideal. Absolutely nothing better.

Save 25c. Obtainment of Cuticura Soap throughout the Dominion, Canadian Depot: L. J. Macdonald, Ltd., St. Paul St., Montreal. Soap, Cuticura Soap shaves without lather.

Strange Cradles

An infant in Guinea is usually buried in sand up to its waist whenever the mother is busy, and this is the only cradle it ever knows. The little Lapp, on the other hand, fares most luxuriously in its mother's shoe. These Lapp shoes are big affairs of skin stuffed with moss, and can be hung on a peg or tree branch safely out of the way.

German Air Trip Round the World

A non-stop dirigible flight around the world will be attempted by the Zeppelin Dirigible Ballon builders in Germany within the next twelve months, according to a statement in New York by Major Charles J. Glidden, an official of the aero club of America.

Canada's Fisheries

Although the total catch of sea fish in Canada in the month of June was 22,104 cwts. less than in June, 1919, its total value was \$376,518 greater. The total value of the June catch at the points of landing was \$3,866,776 as against \$3,019,250 in the same month last year.

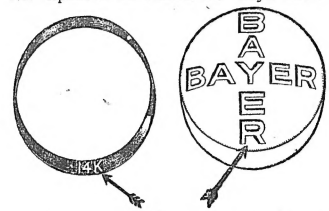

There is always a chance that an opportunity may be connected with a galvanic battery.

Whitening, heretofore obtained almost entirely from Britain, is to be made in Winnipeg.

Most men's tempers are fairly decent when they are sound asleep.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" on Aspirin is like 14 Karat on gold. It positively identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nineteen years and now made in Canada. Tin boxes of 12 tablets cost but a few cents. Larger "Bayer" packages. There is only one Aspirin—"Bayer"—You must say "Bayer" Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocacetic acid of Salicylic acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

COUNTER CHECK BOOKS

Provide the only means by which you can keep an absolute accurate check on your sales. The new luxury tax and sales tax makes it necessary to keep such a record. We make sales books suitable for any line of business, with either duplicate or triplicate copies.

TRIPLICATE BOOKS

There is a heavy demand just now for triplicate books. We make a great variety of triplicate books, both in separate carbon leaf and black back style. Write us for sample and prices before placing your next order, or ask any of our agents to give you this information.

Vegetable Parchment Butter Wrappers

We are in the best position of any firm in Canada to fill your order promptly for parchment butter wrappers, either printed or plain. We are large importers of this brand of paper, and have special facilities for printing wrappers in either one or two colors of ink.

WAXED PAPERS

We also manufacture a complete line of waxed bread and meat wrappers, plain or printed, waxed paper rolls for home use, and waxed papers for all purposes. Our equipment is the most modern and complete to be found in Canada. Our goods are first class and our service is prompt. Let us prove this to you on your next order for Counter Check Books, Parchment Paper, or Waxed Paper.

For quotations apply to publisher of this paper.

A Change of Mind

Boredom Not Always Overcome By A Change of Scenery

Physicians are in the habit of prescribing a change of scene, a change of diet, or a change of climate. They know that the human system periodically requires it.

It is rather a pity that they do not more frequently advise a change of mind.

People are dashing madly about in all directions—to the Highlands or to the Continent—in a desperate attempt to leave boredom behind somewhere en route.

They seldom succeed. If they would try a change of mind, eliminating a lot of worn-out prejudices and ideas, they would be astonished at the result. The world would appear a different place—they might even find that their neighbors were quite decent folks, and that romance still lives in ordinary life.

It isn't always the liver that needs toning up.—London Express.

Will Spend Millions

For Water

Scheme to Improve Southern Saskatchewan's Water Supply

Southern Saskatchewan is taking steps to improve its water supply. The scheme which is being considered by the Saskatchewan Water Supply commission involves bringing water from the Southern Saskatchewan river to Regina and Moose Jaw, a distance of over 130 miles.

Seven million dollars is the minimum cost of the scheme. This figure is based on a main line system to Regina, built of wooden staves, with a branch line to Moose Jaw. If a concrete line is to be used the cost will be \$11,000,000 and if a steel line is used the cost to the cities will be \$13,000,000.

The grass does not quit because it is stepped on.

Pains About the Heart

ANY derangement of the heart's action is alarming. Frequently pains about the heart are caused by the formation of gas arising from indigestion.

Relief from this condition is obtained by the use of Dr. Chase's Kidney-Liver Pills.

Chronic indigestion results from sluggish liver action, constipation of the bowels and inactive kidneys.

Because Dr. Chase's Kidney-Liver Pills arouse these organs to activity they thoroughly cure indigestion and overcome the many annoying symptoms.

Dr. Chase's Kidney-Liver Pills

Prince Edward Island Is Wealthiest Province

Over Eighty Percent of Population Live on Farms

Which province of the Dominion has the greatest wealth per head of the population? Most Canadians would be surprised to learn that it is the isolated province of Prince Edward Island. Agriculture and food-breeding have brought about this happy state of things for the "Red Islanders." Well over 80 percent of the population live on the farm. They produce almost all they require to support existence, and there are not large towns to lure the youth away from the pleasures as well as the labors of country life.

Prince Edward Island is not only the wealthiest province, but also the most populous, proportionately to its area.

The ivy is the ancient badge of the Gordon clan.

Keep the Bowels Regular and You'll be Healthy

For a Quarter You Can Assist Them Wonderfully With Dr. Hamilton's Pills

You'll never have health if the bowels are inactive. By keeping them right you ensure a clean, wholesome body. Why wait for constipation to crop up and sicken the whole system—use Dr. Hamilton's Pills—they are the finest, mildest, laxative known; they strengthen into the muscles of the stomach and never injure the delicate lining of the bowels. They get you into the habit of performing a certain function at a certain time, and thereby restore normal conditions. Dr. Hamilton's Pills are best because they help nature help herself, and thereby keep the stomach strong, digestion good, blood pure, complexion clear, spirits bright and happy. Price 25c.

Men fall down because they miscalculate the width of the ditch.

Minard's Liniment for Burns, etc.

Every man has his worthless days, but if he does not fight them every day will become his worthless day.

Miller's Worm Powders can do no injury to the most delicate child. Any child, infant or in the state of adolescence, who is infested with worms can take this preparation without a qualm of the stomach, and in the state of adolescence relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

To Propagate Reindeer

Plan to Increase and Domesticate the Herd in Labrador

Captain A. H. Living, of the Dominion Parks branch, has been appointed to go to Labrador with the object of taking charge of plans to increase and domesticate the reindeer herd there. At the present time there are about 150 head of reindeer in that locality and it is the ultimate intention of the department to supply the missionaries and the people of the Hudson Bay territory with both a food and transportation system. In order to accomplish this, Captain Living will have to spend the next four or five years travelling various parts of the territory, and for a large portion of the time he will be out of touch with the civilized world. The project has been under consideration for several years, but was held up owing to the war. Captain Living, who has had many years' experience in northern Ontario, Quebec, Alberta and British Columbia, wilds, left Ottawa for Quebec, taking on supplies there, and leaving immediately for the northern coast. Captain Living served nearly five years with the Canadian forces and saw active service in France.

Trade Agreement With West Indies
The new trade agreement concluded recently between Canada and the British West Indies has now been made public. It provides for an increase in the mutual preference from 20 to 50 percent; it extends the free list, and makes arrangements for an increased steamship service—a weekly service between Canada and the eastern group of the British West Indies, and a fortnightly service with the Western group.

Praises This Asthma Remedy.
A grateful user of Dr. J. D. Hogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. He writes: "I have suffered for many years from asthma, and have been prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost slight and it can be purchased almost anywhere."

W. N. U. 1331.

A Satisfactory Barn

Should Be Built With Length Running North and South

Every man who builds a barn wants a satisfactory barn, and if the barn is built during the winter it is not a satisfactory barn. The following points will help you in making the plans for a new barn or for remodeling the old one.

Barns made of lumber are more practical, economical and artistic.

Barns should always be built with the length of the barn running north and south to get sunlight throughout the stock room.

Cows and all small stock should be in the south end of the barn as the south end is always the warmest. Horses and cows should be separated by a tight partition.

Plan six hundred cubic feet for a cow, seven hundred cubic feet for a horse. Figure six calves the same as one cow and two yearlings the same as one cow.

There should be four square feet of glass area per animal and the windows should be placed as near the ceiling as possible. One piece shaft with tight fitting storm windows for the winter.

The most satisfactory plan of a ventilating system can be made with the stock face the centre of the building.

Driveways should be eliminated and litter carriers used instead. All doors should be equipped with storm doors and rolling doors should not be used except when absolutely necessary.

If joists overhead are ceiled, insulation at least one-half inch thick should be used under the ceiling to prevent condensation when the hay is removed from the hay mow floor.

House Shortage in Winnipeg

It is estimated by the chairman of the City Housing Commission that 2,000 houses must be built each year to take care of the normal increase in the Winnipeg population.

HEART SO BAD WAS NOT SAFE TO LEAVE HER ALONE

Miss Eva P. Yatemann, Krugersdorf, Ont., writes: "I feel that I must write and tell you of the benefit I have received from Milburn's Heart and Nerve Pills. About four years ago I was taken terribly bad with my heart, nervous and fainting spells, and was down for several months. I doctored with two different doctors and seemed to get better, although the fainting spells would not leave me. I would take such terrible falls, wherever I was, that it was not safe to leave me alone at any time. At last I decided to resort to proprietary medicines and took several different kinds, but failed to receive but little benefit from them. One day noticing the advertisement of Milburn's Heart and Nerve Pills I decided to try them, and before I had taken more than two boxes I could see they were helping me. I have taken about ten boxes, and an almost cured of those terrible spells. I sincerely feel that your medicine has proved a blessing to me, and I advise any one troubled with their heart to try them, as I am confident they will find relief." Milburn's Heart and Nerve Pills are sold at all dealers or mailed direct on receipt of price by The J. Milburn Co., Limited, Toronto, Ont.

Oil in Far North

Ten Barrel Flow Has Been Struck at A Point Within the Arctic Circle

Oil has been struck by the Imperial Oil Company, at a point just within the Arctic circle, north of the Great Slave lake, and close to the McKenzie river, according to a recent announcement. The flow of oil is small and possibly cannot be made use of economically, but it is regarded as significant that oil has been found there. The flow is ten barrels a day. Much more hopeful enterprises are being carried on at other points, and good results are expected. At Car, Alberta, where the company's well is already 2,000 feet down. It is expected that oil will be found in another 500 feet of boring.

Father Was Stumped

Mr. Binks was a commercial traveler and only came home at long intervals. On one of his returns he was telling his five-year-old son all about his wanderings.

"And then I came home," he finished.

"And did you come in a train, daddy?" asked Johnny.

"Yes, sonny."

"And did you see the ears of the engine?"

"Of course not," laughed Daddy. "Engines don't have ears."

"Oh, yes they do," persisted the small boy. "Haven't you ever heard of the engineers, daddy?"—Pearson's Weekly.

Australian Veterans Out of Employment

Found Conditions in England Entirely New to Them

More than ten thousand members of the Australian Imperial Force took their discharge in England in the confident hope of obtaining quickly remunerative employment, and some of them have fallen on their feet. A large number, however, up against labor conditions entirely new to them are out of work, and are finding it a very different matter from what it is under the sunny skies of Australia, where the temporary workless "hump the blues" (shoulder their haversack) and cheerfully fare forth in search of employment.

To help these men the Australian and New Zealand Services Association has come to the rescue. With offices at 44 Chancery Lane, London, the problem of finding jobs is enthusiastically tackled. The association not only finds jobs but, when necessary, clothes and feeds the applicant to insure a good impression being made on the prospective employers.

How's This?

We offer \$100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the Mucous Surfaces of the System. Sold by druggists for over forty years. J. C. HALL & CO., Toledo, Ohio. Price 75c. Testimonials free.

Argentina is Prosperous

Banks Show Increase in Deposits of Twenty-one Percent

Increased prosperity this year in comparison with 1919 is indicated by banking and railroad statistics of Argentina which have just been published. Official banking reports show that between May 31, 1919, and the same date this year deposits increased 21 percent, loans and discounts 1 percent and balances on hand 40 percent.

Of the 2,414 miles of railway in the country only one group of 118 miles has failed to show increased aggregate receipts, according to a table compiled by the Review of the River Plate, showing conditions for the present year. The remaining lines have all had substantial increases. All the railroads in Uruguay and Paraguay and all tram lines in Argentina have also shown increases.

If, instead of spirits of camphor, camphorated oil is used in cleaning furniture, it will not only remove the white stains, but restore the polish.

THIS WOMAN'S MISERY

Ended by Lydia E. Pinkham's Vegetable Compound. Remarkable Recovery of Mrs. Church.

Smiths Falls, Ont.—"I suffered with falling of my organs, pains around my heart and in bowels and down my legs, neuralgia in my face and head, and that terrible sinking feeling, that I felt I could not live and would fix my house in order every night so there would be no trouble if I dropped off the night. My husband went to the druggist to get the best remedy he had and he gave him Lydia E. Pinkham's Vegetable Compound. I took six bottles and felt a lot better. I will always recommend the Vegetable Compound, and you can use those facts as a testimonial."—Mrs. J. O. CHURCH, Box 848, Smiths Falls, Ont.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used by those who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills. If there are any complications about this you need advice write in confidence to Lydia E. Pinkham Medicine Co., Lynn, Mass.

CLEANLINESS IS HEALTH

By the use of Gillett's Lye, house cleaning is made a pleasure instead of a drudgery. It softens the water and cleans thoroughly whether the dirt is visible or invisible. Destroys all bacteria and infectious germs, removes obstructions from drain pipes, closets, sinks, etc. Refrigerators are made delightfully fresh and clean by using one teaspoonful of Gillett's Lye dissolved in two gallons of water.

"GILLETT'S LYE EATS DIRT"
Made in Canada.

Valuable Timber Destroyed

Miles of Forest Land in B. C. Vast Sea of Flame

Although the forest fire situation is said to be easing somewhat, there are literally hundreds of fires still ablaze in the coast districts of the mainland and Vancouver island. On the east coast of the island, south of Campbell river, no fewer than 250 have been reported to date, both large and small, and much of the growth timber is being destroyed. The worst is in the Stillwater vicinity, where miles of forest are a vast sea of flame. The cause of this has not been determined, but on the island, the trail of the camper is marked by forest fires.

WHY BEAUTY FADES

A Condition Due Entirely to Poor, Watery Blood

The girl who returns home from school or from work thoroughly tired out will be fortunate if she escapes a physical breakdown, because this getting tired so easily is probably the first warning symptom of a thinning blood that must not be disregarded if her health is to be preserved. When the blood becomes thin and impure the patient becomes pale, languid and angular. She not only tires out easily, but suffers from headaches, palpitation of the heart, dizzy spells and a loss of appetite. This condition will go from bad to worse, if prompt steps are not taken to increase and purify the blood supply. To make the rich, red blood that brings the glow of health, no other medicine can equal Dr. Williams' Pink Pills. If given a fair trial their use brings roses, bright eyes, a good appetite and good spirits. Dr. Williams' Pink Pills have made thousands of pale, languid girls active and strong. On the first sign of poor, thin blood mothers should insist upon their daughters taking a fair course of these pills, but will not only restore health, but will save further doctors' bills.

Dr. Williams' Pink Pills can be obtained from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The Prince Wins All Hearts

Good Work Accomplished Wherever He Goes

It would be difficult to overestimate the influence which this delightful fraternization of the Prince with the people of the Dominions will have—there can be no doubt that he will make the same conquest of hearts wherever he goes. The affection with which our soldiers learned to regard the Prince in France will be strengthened by the renewal of their intercourse with him. Wherever he has been he has been corded them as the most important person in the company. His keen eye has picked them out, and he has, without ceremony, left the surrounding dignitaries to chat with them—Melbourne Argus.

Worms cause fretfulness and rob the infant of sleep, the great nourishment. Mother Gravel's Worm Expeller will clear the stomach and intestines and restore healthfulness.

The longest ship canal in the world is the Suez canal, which measures 87 miles. Kiel canal, comes next with 61 miles, and Panama third with 40 miles.

A Simple and Cheap Medicine.—A simple, cheap and effective medicine is something to be desired. There is no medicine so effective a regulator of the digestive system as Parnele's Vegetable Pills. They are simple, they can be got anywhere, and their beneficial action will prove their recommendation. They are the medicine of the poor man and those who wish to escape doctors' bills will do well in giving them a trial.

The man who gets a black eye generally deserves it.

Why is the candy shop always on the ground floor and the dentist's office four flights up?

Minard's Liniment Relieves Neuralgia

Educational Co-Operation

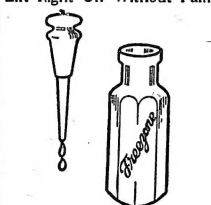

Let the parents visit the public schools. Let them become directly familiar with the work their children are doing. Let them form their own judgment as to the efficiency or inefficiency of the teachers. Let them go further than merely observing the current work of their children; let them visit the more advanced grades and form intelligent opinions as to the value of advanced work.

SAY "DIAMOND DYES"

Don't streak or ruin your material in a poor dye. Insist on "Diamond Dyes." Easy directions in package.

"CORN"

Lift Right Off Without Pain

Doesn't hurt a bit! Drop a little "Frezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with the fingers. Truly!

Your druggist sells a tiny bottle of "Frezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Italy's perfume manufacturers consume 1,800 tons of orange blossoms, 900 tons of roses, 15 tons of jasmine and violets and 15 tons of jonquils annually.

Stereotyping was invented in 1725, plaster casts being used in the original process.

ECZEMA

Duck Shooting

The duck shooting season opened on Wednesday morning. A large number of our local sports were about as early as 4 a. m. that morning and made good use of their time. Several good bags were reported. Although plentiful, the birds are rather small yet, and hard to get owing to the long grass.

An Interesting Address

An interesting and instructive address was given in the church on Wednesday night by Rev. J. B. Taylor, of Saskatoon, who was visiting Chinook in the interests of the British and Foreign Bible Society. Using a blackboard to illustrate his address, Mr. Taylor dealt with the work the society is doing in translating, publishing and distributing the scriptures. He traced the progress of the work from 1804, when the society was formed to give the bible to all the peoples of the world in their own tongues. Now fifty printing establishments are engaged in publishing the scriptures in 633 languages and dialects, and it is hoped before long to add too more languages to the number in which it is being published. Sixty different series of characters are being employed. In China alone, 29 different dialects are required. Provision has also been made to supply bibles to the blind. In Canada colporteurs are engaged circulating copies of the scriptures in 110 different languages. \$2,000,000 are required this year to carry on the work, as the society sells at practically cost price, and gives away the bible to those too poor to buy.

At the close of the address officers were elected to the local branch of the society, as follows: President—Rev. G. H. Elliott; Secretary—C. W. Rideout; Collectors—Mrs. J. R. Miller and Mrs. A. Wilson.

Dinty Moore Club

At the last regular meeting of the Dinty Moore Club, Happy Ray was appointed president, Mr. Glendenning, vice president, H. Meade, secretary, and C. W. Spicer, chucker-out.

Ladies' Card Club

The Ladies' Card Club met at the home of Mrs. Chapman last Thursday evening, September 2nd. Mrs. Hinds' substitute, Mrs. Cruickshank, held the highest score for the evening, having 146 points. Miss Somers of the bank staff, will take Mrs. Cruickshank's place for the month of September. Miss Milholm, also of the bank staff, has been playing in Mrs. McKenzie's place during her sickness. Miss L. Porter has taken Mrs. Wylie's place. The club will meet at the home of Mrs. Meade on Thursday, September 9th.

Local

Auction sale bills printed at this office.

Harold B. Allen, of Heathdale, is on a business visit to Calgary.

Dr. Bridgeman, B.A., of Saskatoon, eye specialist, will be in Chinook again on Sept. 24th.

Under the auspices of the Dinty Moore club, a dance will be given in Arm's Hall, Chinook, on Labor day, Sept. 6th.

Church services will be held on Sunday at Laughlin School at 11 a. m.; Peyton School at 3 p. m. and in Chinook Church at 7.30.

Important Notice

TAX RECOVERY ACT

To all parties whom it may concern: Take notice that the provisions of the Tax Recovery Act are operative for the year 1920, within the bounds of every municipality, urban and rural, and every Improvement District of the Province of Alberta.

The land will be advertised for sale, as soon after August 14th as possible, by the Municipal taxing authority and on the day and hour and at the place mentioned in the advertisement; will be sold for the taxes in arrears as of date December 31st, 1919, together with the costs. Owners, mortgages, encumbrances, and any others interested should communicate with the municipal authority levying the tax. The arrears and costs may be paid up to the time of sale, and after the sale there is one year for the redemption of the land.

Prohibitionists Organizing

From information gathered at the headquarters of the Alberta Referendum Campaign Committee in Edmonton the campaign conducted by prohibitionists is well under way. Under the committee's direction the office and field staff have been appointed and organization of district and local committees has been rigorously promoted. H. H. Hull, general secretary of the Social League is provincial organizer and business manager of the campaign and Rev. E. S. Bishop, till recently Child Welfare Secretary of the league, and now a field secretary of the Department of Evangelism of the Methodist Church, has been loaned by the church to the campaign and is serving as office secretary and editor of the Searchlight, which is the official organ of the campaign. Rev. A. C. Bryan, Presbyterian minister of Taber, was appointed secretary of the provincial committee and is giving his full time to the campaign in the office in Edmonton.
